

## NIET's Overall Impact

For over 20 years NIET has supported states, districts, and schools across the country to improve teaching practices and student outcomes. In an independent analysis, NIET partner schools not only showed improvement over comparison schools, but they grew at faster rates and maintained that improvement over time.

Mann, D., Leutscher, T., Reardon, R. M. (2013). Findings from a Two-Year Examination of Teacher Engagement in TAP Schools Across Louisiana, Interactive Inc.

We believe that the effectiveness of our work, and partnerships, is not only measured by our impact on summative data points, but also on the impact that we have on the work and growth of teachers in classrooms. To that end, we are proud of the retention effects that our partnerships have had on schools and districts across the country. On average, after working with NIET, our partners are realizing far higher levels of retention than both comparison and national average levels.

NIET Research and Evaluation Department, 2014

Our most recent [research summary](#) shows the incredible impact that our work can have on student outcomes, educator retention, and educator effectiveness on communities throughout the country. Within this summary, we examine the impact of our work at the state, district, and school levels as well as the impact of our work in the higher education space.

**Examples of Specific Partner Outcomes**

Since 2010, NIET has partnered with Perry Township Schools in Indiana, where 27% of the student population are English Learners—representing the highest percentage in the state—and 71% of students are eligible for free and reduced-priced lunch. Since partnering with NIET, Perry has fostered a 21% increase in their English Learners reading at a Level 5 and they have surpassed the state on the ISTEP+ pass rate with 51.3% of students passing, the percentage of graduates passing an AP exams with 24.6%, and the overall graduation rate with 95.2% of students graduating.

NIET has partnered with DeSoto Parish Schools in Louisiana for over 10 years. In 2019, a [local news publication](#) covered DeSoto Parish Schools' state leading student growth. As a part of our on-going tailored support, we partnered with the district as they adopted and implemented a number of high-quality curricula. This support culminated in DeSoto seeing overall performance growth in English, mathematics, and social studies.

In 2018, we began supporting Sarah Moore Greene Magnet Academy in Knox County, TN and after consecutive years of level 1 growth and placement on the state's Priority School List, the school moved to level 5 literacy growth in 2019. As a part of our on-going, tailored support we worked with the school's instructional leaders on learning walks to analyze the quality and depth of the instruction and modeling a common language around instruction that teachers adopted. This also included support as the school began to implement the Wit and Wisdom curriculum. The next year, we were proud to announce they had received NIET's School of Promise Award for embracing a culture of data-driven collaboration and making ongoing investments in professional learning and coaching for teachers.
